

Algebraic Topology

Lectured by Steven Sivek

Scribed by Yu Coughlin

Spring 2026

Contents

1	Topology	2
1.1	(co)limits in the category of topological spaces	2
1.2	CW complexes	2
2	Fundamental group	2
2.1	The circle	2
2.2	Functoriality	2
2.3	Siefert-van Kampen	2
3	Covering spaces	2
3.1	Covers and π_1	2
3.2	Deck transformations	2
3.3	Universal covers	2
3.4	Galois correspondence	2
4	Homology	2
4.1	Simplicial homology	2
4.2	Singular homology	2
4.3	LES of a pair	2
4.4	Barycentric subdivision	2
4.5	Excision, MV, and equivalence	2
4.6	Cellular homology	2
4.7	Degrees	2
4.8	π_1 and H_1	2

1 Topology

1.1 (co)limits in the category of topological spaces

1.2 CW complexes

2 Fundamental group

2.1 The circle

2.2 Functoriality

2.3 Siefert-van Kampen

3 Covering spaces

3.1 Covers and π_1

3.2 Deck transformations

3.3 Universal covers

3.4 Galois correspondence

4 Homology

4.1 Simplicial homology

4.2 Singular homology

4.3 LES of a pair

4.4 Barycentric subdivision

4.5 Excision, MV, and equivalence

4.6 Cellular homology

4.7 Degrees

4.8 π_1 and H_1
